DETAILED ACTION

Specification

1. The examiner respectfully suggests that the Applicant carefully review the specification for idiomatic and grammatical errors, which may have inadvertently overlooked.

Claim Objections

2. Claim 2 is objected to because of the following informalities: the applicant repeatedly uses the limitation "and/or". This does not conform to US claim construction in that the applicant has effectively claimed both the alternative and combination. The examiner has examined the application on the merits with the assumption that the applicant meant "or" (the alternative). Appropriate correction is required.

3. Claims 5 – 8, 10 – 14, 19 and 20 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits.

Allowable Subject Matter

4. Claims 1 – 4, 9, and 15 – 17 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: Prior art of record does not teach of a negative feedback controlled power method with the step of A/D conversion twice in parallel as claimed in claim 1, and the step of calculating a pulse width adjustment increment as claimed in claim 2; a negative

feedback controlled power supply with the combination of features of the A/D converter unit of claim 15 and the controller unit of claim 16.

6. This application is in condition for allowance except for the following formal matters:

The objections to the claims as stated above must be addressed.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
